TECHNICAL SKILLS

• Programming:	Python, SQL, C++, Java
• Data Analytics:	Pandas, NumPy, Data Cleaning, Data Preprocessing, EDA, Statistical Analysis
• BI & Visualization:	Power BI, Excel, DAX, Power Query, Matplotlib, Seaborn, KPI Dashboards
• Machine Learning & Databases:	Machine Learning, Feature Analysis, Model Evaluation, DBMS
• Data Engineering:	ETL Pipelines, Data Transformation, Data Modeling, Star Schema, Snowflake Schema
• Tools:	Jupyter Notebook, Git, GitHub, Spyder, Leet Code
• Professional Skills:	Project Coordination, Documentation, Communication Skills, Team Collaboration, Problem-Solving

PROJECTS

• Credit Card Fraud Detection & Risk Analytics Live Demo GitHub	Jul 2026- Aug 2026
• Built a machine learning solution to detect fraudulent credit card transactions and classify transaction risk.	
• Prepared transaction records, addressed class imbalance with SMOTE, trained Logistic Regression and Random Forest, and integrated SQL queries, SHAP explanations, FastAPI inference, Streamlit interface, automated tests, and cloud deployment.	
• Tuned the Random Forest classification threshold to achieve 93.24% precision, 72.63% recall, and 97.68% ROC-AUC on the test set.	
Tech Stack: Python, SQL, Scikit-learn, Streamlit, FastAPI, SHAP	
• NYC Vehicle Collision Analysis & Severity Prediction Python repo Dashboard repo	Jun 2026– Jul 2026
• Examined NYC vehicle collision records to determine factors linked to collision severity and predict severity levels.	
• Applied data cleaning, exploratory analysis, severity-index engineering, and visualization with Pandas and NumPy. Evaluated Logistic Regression, Decision Tree, Random Forest, KNN, and Gradient Boosting, followed by an interactive Power BI dashboard with Power Query, DAX, KPIs, and data modeling.	
• Gradient Boosting reached 69.71% accuracy. The dashboard highlighted differences in collisions by borough, time, contributing factors, injuries, and fatalities.	
Tech Stack: Python, Pandas, NumPy, Matplotlib, Scikit-learn, Power BI, DAX	
• Stroke Data Analysis & Health Insights Dashboard GitHub	May 2026–Jun 2026
• Explored state-level stroke statistics to understand differences in rates, prevalence measures, population distribution, and uncertainty across years.	
• Processed records with Python, Pandas, and NumPy, then created a Power BI dashboard featuring Power Query, DAX measures, KPIs, geographic visuals, confidence intervals, slicers, and a decomposition tree.	
• Revealed state-wise variation in stroke rates, differences between age-adjusted and crude prevalence, and changes across years and confidence-interval ranges.	
Tech Stack: Python, Pandas, NumPy, Power BI, DAX	

CERTIFICATIONS

• Oracle AI Database Certified Foundations Associate – Oracle	Jul 2026
• Database Management System Part – 1 – Infosys Springboard	Jul 2026
• Python 101 for Data Science – IBM	Sep 2025
• TCS ION Career Edge – Young Professional – TCS	Sep 2025

ACHIEVEMENTS

• Smart India Hackathon (SIH) 2026 – Pre-Finalist	Sep 2026
Participated in the Smart India Hackathon 2026 and advanced to the Pre-Final Round through the internal campus selection, competing among 950+ teams.	
• Outstanding Grade (A) – Summer Training Program	Aug 2026
Secured an Outstanding Grade (A) in the Summer Training Program conducted by the Centre for Professional Enhancement, LPU, focused on AI-driven full-stack development.	
• Certified Volunteer – Cybersecurity Awareness Program	Aug 2025
Recognized as a volunteer for conducting cybersecurity awareness training for 100+ students and senior citizens, covering safe digital practices, online security, and cyber threats.	

EDUCATION

• Lovely Professional University	Phagwara, Punjab
Bachelor of Technology – Computer Science and Engineering; CGPA: 8.08	
• Sri Chaitanya Junior College	Vijayawada, Andhra Pradesh
Intermediate; Percentage: 94.9	
• Sri Chaitanya Techno School	Anantapur, Andhra Pradesh
Matriculation; Percentage: 92.6
